

COMING SOON!

Electronic Visit Verification (EVV)

March 2022

We encourage your continued use of the **Time4Care™** app for your **time entry**. In **March 2022** you can expect to see **EVV** added to the app.

After EVV is added, you will no longer be able to use paper timesheets.

How-to guides are open to you to view at:
www.publicpartnerships.com/tools/time4care-evt/

More Information – Online resources are available for you to view and access for more information regarding EVV. In addition we will offer information sessions.

March 2022 – **Time4Care™** will be required for time entry and may be used for time approval if desired.

Ongoing – These resources will be updated as the app is updated and changes are made within your program.

WHAT IS EVV AND WHY DO WE HAVE TO USE IT?

The 21st Century Cures Act federal law requires an Electronic Visit Verification (EVV) system to be used for clocking-in and clocking-out when giving services for Medicaid recipients. This system also records the location of the person clocking-in or -out. It does not record the location during the shift or at any other time.

EVV helps make sure that those people needing services are getting what they need, and that person's Medicaid money is being used appropriately.

WHAT DO WE USE FOR AN EVV SYSTEM?

Your program is using PPL's **Time4Care™** mobile application (app), which can be used on an Android or Apple smart phone or tablet, as long as it has location services for GPS.
