

Dear [insert member name],

Public Partnerships is pleased to provide Electronic Visit Verification (EVV) for the Kansas WORK self-directed care community. EVV technology is available with the Time4Care™ mobile app. EVV is a way to record workers' location when they are providing your care. Using EVV may reduce fraud. EVV is also a way to be sure that you get the care you need.

Time4Care allows your worker(s) to clock in and clock out to record their time and location. The app logs their location only at the time of the clock in and out. It does not record their location at any other time. You can use Time4Care to approve worker(s) timesheets.

All workers are asked to download and begin using the Time4Care mobile app by (4/1/2019). If you and your worker(s) are using the Time4Care app now, you can keep using it.

The Time4Care app is free to download from the Apple or Android app store. The app works on a cell phone or tablet. Also, with this letter are "EVV Introduction" and "Quick Guide to Time4Care" sheets. These documents will help you get started. Please let us know if you have any questions. You may contact us toll-free at 1-833-549-5673.

Thank you,

Public Partnerships, LLC
