

PPL IS EXCITED TO SHARE A NEW TIME4CARE™ FEATURE.

You can now view EVV usage on your dashboard!

This feature shows your providers' EVV use! It is your role to ensure providers understand EVV requirements. Below you will find the ranges for EVV usage percentages.

EVV adoption is your responsibility. If your provider is not using EVV, it could impact your services. This feature allows you to see how well your provider is doing with EVV.

The goal is for providers to have perfect EVV shifts. A perfect EVV shift is when your provider has clocked in and out at the beginning and end of their shift, without any edits.

Please note - the percentages displayed are time entries that have been PAID in the last 30 days. These are updated every Saturday. Remember, unpaid entries are not counted.
