

PPL IS EXCITED TO SHARE A NEW TIME4CARE™ FEATURE.

You can now view EVV usage on your dashboard!

This feature has been added to help you understand if you are using EVV correctly. We want you to have perfect EVV shifts. A perfect EVV shift is one in which you have clocked in and out at the beginning and end of your shift, without any edits.

It's important to understand that the percentages displayed are based only on your time entries that have been PAID in the last 30 days. Your percentages are updated every Saturday.

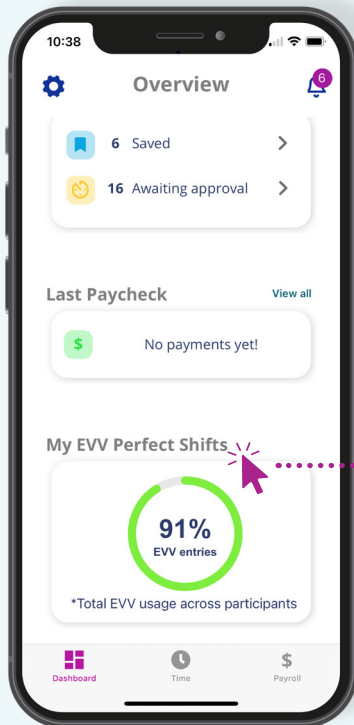

Remember, unpaid entries are not counted. You can see details about all your shifts so you can work on making improvements to reach the goal of at least 90% perfect EVV shifts.

High 90% & above. **GOAL**

Med 70-89%

Low 0-69%

This will be the new view when you log into the app and scroll down:

Tap on My EVV Perfect Shifts

you will see this information:
